PROFESSIONAL SUMMARY

Pipeline Operations Engineer with over 3 years of experience keeping a live multi product petroleum pipeline (HPCL VDPL) running safely, day in and day out. I work across control room monitoring, field operations, and maintenance using SCADA and PLC systems to track real time flow, catch abnormalities early, and keep 24x7 shift operations on track. My work spans pigging operations, cathodic protection, and coordinating safe startup/shutdown with upstream and downstream stations. I bring an M.Tech in Energy Technology alongside hands on field experience, and I am now looking to broaden into mechanical engineering roles beyond pipelines, including control room, field, maintenance, design, or manufacturing, wherever I can keep learning new systems.

KEY HIGHLIGHTS

- 3+ years of hands on experience across control room, field, and maintenance functions on a live multi product petroleum pipeline (HPCL VDPL).
- Regularly coordinate with upstream and downstream pipeline stations to plan and execute safe startup/shutdown sequences.
- Combine engineering education (M.Tech, Energy Technology) with field operations experience in oil and gas pipeline systems.
- Open to work: actively seeking roles across all areas of mechanical engineering, not limited to pipeline operations.

CORE COMPETENCIES

Pipeline Operations, Oil and Gas Operations, SCADA Systems, PLC Operations, Control Room Operations, Multi Product Pipeline Handling, Pumping and Storage Operations, PIDS, Leak Detection, Pigging Operations, Cathodic Protection, Preventive and Breakdown Maintenance, Emergency Response, Process Safety, Work Permit Systems, Inspection and Reporting

PROFESSIONAL EXPERIENCE

Engineer (Contract), Deputed to HPCL, VDPL Pipeline

Feb 2025 to Present

SINCLUS Engineering (Mar 2026 to Present); Aarvi Encon Limited (Feb 2025 to Feb 2026); Dharmapuri, Tamil Nadu

- Monitor oil movement, pumping, storage, and pipeline integrity in real time using SCADA and PLC based control systems.
- Manage control room operations including alarm handling, abnormal condition response, and shift to shift coordination in a 24x7 environment.
- Execute pigging operations, including pig launching, receiving, line preparation, and continuous monitoring, to maintain pipeline flow assurance.
- Perform maintenance on pumps, valves, pig barrels, basket filters, and SV stations, supporting reduced unplanned downtime through preventive upkeep.
- Monitor and maintain cathodic protection systems to prevent corrosion on underground pipeline assets.
- Carry out fire hydrant system checks, piping work, and mechanical installations in line with safety standards.
- Prepare maintenance schedules, inspection reports, and operational documentation to support audit readiness.
- Conduct toolbox talks, issue work permits, and lead mock drills as part of internal safety audit participation.
- Coordinate with upstream and downstream stations to ensure safe pipeline startup and shutdown.
- Perform regular Right of Use (ROU) inspections to identify encroachment risks and maintain pipeline safety.

Supervisor

Jul 2023 to Jan 2025

TNRTP Marutham Farmer Producer Company Limited; Coimbatore, Tamil Nadu

- Supervised daily operations and coordinated staff activities focused on solar dryers and related solar-based equipment.

EDUCATION

M.Tech, Energy Technology, Periyar University (2022 to 2024) — Score: 76%

B.E, Mechanical Engineering, Government College of Engineering, Dharmapuri (2019 to 2022) — CGPA: 8.2

Diploma, Mechanical Engineering, Muthayammal Polytechnic College (2016 to 2019) — Score: 90.25%

PROJECTS

- Experimental Evaluation and Numerical Analysis of Floating Photovoltaic Thermal (FPVT) System Performance, M.Tech project
- Solar Powered Peltier Based Fully Automatic Egg Incubator, B.E. project
- Fabrication of Two Stroke Petrol Engine with Double Spark, Diploma project

TECHNICAL TOOLS

SCADA (Operations), PLC (Operational Level), AutoCAD, Creo, ANSYS, MS Office, STS, PIDS

LANGUAGES

Tamil (Native), English (Read, Write, Speak)

TRAININGS AND SAFETY PRACTICES

Work Permit System (PTW) Issuance, Toolbox Talks and Mock Drill Facilitation, Internal Safety Audit Participation, Hazard Identification and Risk Assessment (HIRA) Awareness
